

REGIONAL MAYORS CYBER CUP

This program is not just another cyber competition but a program to engage students, faculty, municipal leaders, and business to grow your CTE programs across the region.

Using a number of key engagement techniques, this program can help expand your IT and Cybersecurity programs to schools and colleges across your region, giving many in underserved communities an opportunity to start a technology career.

NOT JUST A ONE DAY EVENT

INTRODUCING OPPORTUNITIES

We have found that success of these events sets the stage for continued growth and expansion of your ICT and CTE programs, and creates increased interest in pursuing careers in cybersecurity or IT while providing students with the skills and knowledge needed to succeed in the ever-evolving technology landscape. These competitions are traditionally focused on middle and high schools students, but by including community college students, the other students get what is often their first introduction to the opportunities available for continuing their learning in a local institution.

"SynED took care of the logistics, content, and execution of the program as they have in years past, but this year they also led our Community of Practice efforts, which is why we saw the success in new program growth. It made my life easier as I didn't have to worry about the details, and I met my goals for program growth."

~Jared Amalong

COMMUNITY OF PRACTICE

We work with you and your team to create a community of practice portal to support coaches, faculty and others desiring to grow or start cybersecurity or IT programs at their institutions.

LIVE@5 VIDEO PODCAST

Competitions feature a virtual "[LIVE@5](#)" video podcast. These casts occur in several installations running up to the event and include pre-competition training sessions, speakers from academia, business, the cybersecurity industry, and government.

MAYORS GET THE TROPHY

Winning teams present the regional perpetual cup to their mayor in the city council meeting. This brings awareness of cybersecurity and IT to the community and helps get municipal leaders behind the expansion of the programs in your service area.

See how SynED can help you explore the many possibilities and potential growth of your IT and cybersecurity programs by deploying your own [Regional Mayors Cyber Cup](#).
